

## Correction: *Rare case: paraneoplastic syndrome affecting peripheral nerves, associated with anti-collapsin-response mediator protein-5 (anti-CRMP5) antibodies, as early manifestation of small cell lung cancer confined to a solitary lymph node without evidence of lung mass on routine CT thorax*

Khan U, Warriach SA. Rare case: paraneoplastic syndrome affecting peripheral nerves, associated with anti-collapsin-response mediator protein-5 (anti-CRMP5) antibodies, as early manifestation of small cell lung cancer confined to a solitary lymph node without evidence of lung mass on routine CT thorax. *BMJ Case Rep* 2020;13:e232656. doi:10.1136/bcr-2019-232656

This article was previously published with errors in authorship. Two authors have been erroneously removed from the article. Below is the correct author list and order:

Umar Khan, Sanval Ahmed Warriach, Aiden O'Brien, Peter Boers

Case reports provide a valuable learning resource for the scientific community and can indicate areas of interest for future research. They should not be used in isolation to guide treatment choices or public health policy.
